Position: Associate Level-Full Stack Developer (Entry to Mid-Level)

Location:
- Noida, India (Onsite)

Experience:
- 1–3 years in full-stack development (No Freshers)

Openings:
- 2 positions (<u>Immediate Joiners Only)</u>

Compensation (CTC):
- ₹7–10 LPA (Annual CTC range)

We're not looking for "just developers."

We're looking for builders self-motivated, proactive engineers ready to create next-gen AI-powered products with a seasoned US-based leadership team. You'll work on global projects spanning fantasy sports platforms, AI-driven applications, and high-performance web/mobile solutions and you'll ship them fast.

About Us

We are a UAE based Technology Studio with our core development and AI teams in California, USA. We create and scale our own in-house products while also delivering high-impact digital solutions for select global clients. With a strong track record in building scalable web and mobile applications, we are now establishing our high-performance engineering core in India. This team will work in close sync with our senior tech and AI leads in the US. Starting lean for the first 4 to 6 months and then scaling rapidly as the senior leadership is built locally.

Must-Have Skills & Experience

- Frontend & Mobile:
  - React.js / Next.js – min. 1 year production-level experience
  - React Native and/or Flutter – must have shipped at least 2 mobile app (Play Store/App Store)
- Backend:
  - Node.js, Express.js – solid understanding of server-side architecture
  - MongoDB, PostgreSQL, Firebase – experience designing & managing scalable databases
- DevOps & Deployment:
  - CI/CD workflows (GitHub Actions, GitLab CI, or similar)
  - Experience deploying apps using Vercel, AWS, or similar platforms
- Version Control:

- Advanced Git/GitHub usage (branching strategies, PR reviews, conflict resolution)
- AI-Driven Development:
  - Familiarity with AI coding tools (Cursor, Vercel v0, DeepSeek, Gemini, Boalt AI etc.)
  - Ability to integrate AI features into web/mobile apps
- Web & Mobile Delivery:
  - Proven track record of end-to-end product delivery (web & mobile)
  - Strong debugging, optimization, and performance-tuning skills

Good-to-Have Skills

- Django/Python backend experience
- Knowledge of microservices & serverless architectures
- Familiarity with cloud services like AWS Lambda, Firebase Functions
- UI/UX understanding ability to work closely with designers and tools like FIGMA
- Knowledge of testing frameworks (Jest, Cypress, Playwright)
- Understanding of WebSockets, GraphQL, and real-time data handling

Expected Qualifications

- Bachelor's degree in Computer Science, IT, or related field (or equivalent real-world experience)
- 1–3 years of hands-on experience building & shipping both web and mobile applications
- Strong grasp of modern JavaScript/TypeScript practices

Roles & Responsibilities

- Build, test, and deploy production-ready web & mobile apps no "bench time"
- Collaborate closely with US-UAE-based senior Team, product managers, and designers
- Set up & maintain CI/CD pipelines for smooth and reliable deployments
- Write clean, maintainable, and well-documented code
- Proactively identify & fix issues before they become blockers
- Take ownership of features from concept to deployment
- Stay updated on emerging tools & frameworks, especially AI-assisted development
- Participate in code reviews & contribute to engineering best practices

What We Expect from You

- Self-Starter Mindset: You take initiative, don't wait for instructions to the last detail
- Ownership & Accountability: You own the feature you build, end-to-end
- Fast Learner: You quickly adapt to new tools, especially AI-powered workflows
- Proactive Problem-Solver: You find ways to deliver even if roadblocks come up
- Global Quality Standard: You build like you're shipping for the world, not just locally

Why Join Us?

- Direct mentorship from a US-based AI-first engineering team
- Opportunity to move to our Dubai office for top performers
- Work on high-impact global products from day one
- Culture that rewards speed, innovation, and ownership

If you're someone who thrives in fast-moving, no-excuses, high-growth startup environments, this is your launchpad.
